LANDSCAPE HEALTH CARE

100% Organic Complex

Reduces Watering by up to **50%** or more
and Fertilizer usage by up to **75%**

Bio-Magic is a 100% Organic Complex of Beneficial Cultures & Photosynthetic Microbes. These Microbes Produce Plant Sugars & also form H2O Molecules to Help Sustain Host Plant

Promotes Lush Growth for
Turf, Trees, Shrubs, Flowers and Vegetables

Fortifies Plant Defense Systems and
Stimulates Flower & Crop Yields

What value is there in using these photosynthetic organisms in growing and nurturing plant life?

In recent years, probiotics has become a buzzword in nutrition. **Bio-Magic** now brings probiotics to crop and landscape applications. Overuse of inorganic pesticides & fertilizers have greatly reduced the numbers of naturally occurring beneficial microbes in the environment.

Bio-Magic replenishes and repopulates these beneficial organisms, restoring a healthy ecosystem that helps plants to thrive. **Bio-Magic** microbes nourishes it's host plant by processing essential elements that may be chemically bound & otherwise unavailable to that plant.

SAFE • NON-TOXIC • FAST ACTING • 100% ALL NATURAL • BIODEGRADABLE

Recommended Directions For Use:

Shake well, attach hose end sprayer to bottle and hose. Apply directly to turf, plants, flowers and trees. Evenly cover the area until the bottle is empty. Apply to turf after mowing. ***Be sure to put recap the concentrate bottle after use if any product is being saved to insure proper microbe store conditions.** Follow up minimum application rate every 45 days.

Startup Hose End Spray Rate: 32 oz. per 6,000-8,000 sq ft One gallon treats 44,000 sq ft 1 acre

Maintenance Hose End Sprayer Rate: 16 oz. per 6,000-8,000 sq ft One gallon maintains 1 acre

Safety and Handling:

Keep out of reach of children. Do not ingest. If swallowed, induce vomiting, if advised by physician. May irritate eyes, flush with clean water. Avoid open wound contact, wash with soap and water. Contains NO poisons or Toxins. Contains over 150 billion beneficial microbes
